

CONTENTS OF VOLUME 32 (1990)

Numbers 1, 2 (Simulation Society of Australia (Inc) 8th Biennial Conference, 1989), April 1990

Introduction, <i>A.J. Jakeman (Australia)</i>	1
Keynote Papers	
Epidemic modelling and simulation, <i>J. Gani (USA)</i>	3
Construction of hydrological models for natural systems management, <i>T.G. Chapman (Australia)</i>	13
Modelling complex natural processes with small observation sets: the case of acidification of surface waters in North America and Europe, <i>G.M. Hornberger (USA)</i>	39
Cloud-average concentration statistics, <i>P.C. Chatwin and P.J. Sullivan (UK / Canada)</i>	49
Environmental Modelling	
New approaches to modelling the global distribution of trace gases in the troposphere, <i>J.A. Taylor (Australia)</i>	59
Fumigation modelling - a Lagrangian particle approach, <i>P. Hurley and W. Physick (Australia)</i>	65
Simulation of sea water intrusion, <i>F. Ghassemi, A.J. Jakeman and G. Jacobson (Australia)</i>	71
Designing artificial lakes as pollution control devices, <i>R.S. Anderssen, C.R. Dietrich and P.A. Green (Australia)</i>	77
Modelling the environmental effects of training on a major Australian army base, <i>S.M. Cuddy, P. Laut, J.R. Davis, P.A. Whigham, J. Goodspeed and T. Duell (Australia)</i>	83
Modelling the wind flow pattern around a parabolic sand dune, <i>J.J. Finnigan, D. Neil, B.G. Lees, R.J. Croome and M. Woodgate (Australia)</i>	89
Offshore bar formation in a shallow water, limited fetch environment, <i>S. Noble and B. Lees (Australia)</i>	95
Weather Simulation	
Some fundamental questions in stochastic simulation of weather sequences, with applications to ANUCLOUD, <i>E. Chia (Australia)</i>	101
Simulation of areally integrated spatial-temporal rainfall field for use in rainfall-runoff models, <i>M.T. Retnam, B.J. Williams and G. Kuczera (Australia)</i>	107
Stochastic weather modelling: a phenomenological approach, <i>L. Guenni, D. Charles-Edwards, C.W. Rose, R. Braddock and W. Hogarth (Australia)</i>	113
Modelling rainfall as a fractal process, <i>T. Beer (Australia)</i>	119
Robust calibration of seasonally varying stochastic weather models using periodic smoothing splines, <i>M.F. Hutchinson (Australia)</i>	125
Optimisation and Resource Allocation	
Dynamic optimization with multiple objectives and the valuation of public goods of community reservoirs, <i>S. Mahendrarajah (New Zealand)</i>	131

The economic analysis of public sector forest management using linear programming: Selected results from an Australian application, <i>D. McKenney and M. Common (Australia)</i>	137
Modelling tools for water management, <i>B. Henderson-Sellers and D.R. Gallagher (Australia)</i>	143
Simulated annealing for a constrained allocation problem, <i>P.M. Jellett (Australia)</i>	149
Computational Methods and Engineering Applications	
A particle method for a scalar advection diffusion equation, <i>S. Roberts (Australia)</i>	155
A model of coupled water, water vapor and heat transport in porous media and a simulation analysis of evaporation, <i>J.Z. Yang and I. White (Australia)</i>	161
Percentile estimation of the three-parameter gamma and lognormal distributions: methods of moments versus maximum likelihood, <i>J. Bai, A.J. Jakeman and J.A. Taylor (Australia)</i>	167
A comparison of some methods of stochastic modelling of solar energy photovoltaic storage systems, <i>D.G. Doran (Australia)</i>	173
A finite element formulation for cables suitable for dynamic modelling, <i>N. Haritos and D.T. He (Australia)</i>	179
Estimation Techniques	
The estimation variance of the areal mean of a sampled random field, <i>D.V. Hansen, P.J. Dillon and P.I. Brooker (Australia)</i>	185
Sensitivity of kriging and spline interpolation to data perturbations, <i>C.R. Dietrich (Australia)</i>	191
The effects of misspecification in estimating the percentiles of some two- and three-param- eter distributions, <i>J. Bai, A.J. Jakeman and M. McAleer (Australia/Japan)</i>	197
The nonparametric estimation of growth curves, <i>R. Kohn and C.F. Ansley (New Zealand)</i>	203
Recursive smoothing of environmental time-series, <i>C.N. Ng and P.C. Young (Hong Kong/ UK)</i>	209
Monte Carlo and other methods for nonlinear non-Gaussian estimation, <i>P.R. Benyon (Australia)</i>	215
Ecological System Approaches	
Trilogy - three hierarchical models of plant succession, <i>I.R. Noble, A.D. Moore and T.J. Montgomery (Australia)</i>	221
A modelling framework for the spatial extension of ecological relations in vegetation studies, <i>B.G. Mackey and T. Bayes (Australia)</i>	225
Wildlife management in Australia: New developments and opportunities using computer- based generic models, <i>T.W. Norton and J.E. Williams (Australia)</i>	231
A generic approach to landscape modelling, <i>D.G. Green, R.E. Reichelt, J. van der Laan and B.W. Macdonald (Australia)</i>	237
Process modelling and geographic information systems: breathing life into spatial analysis, <i>K.J. Granger (Australia)</i>	243
Parallel computing in ecological simulation, <i>D.R.B. Stockwell and D.G. Green (Australia)</i>	249
Designing a database for coastal planning and management, <i>J.K. Bowyer (Australia)</i>	255
News of IMACS	261

Number 3, June 1990

Identifiability and indistinguishability of linear compartmental models, <i>K.R. Godfrey and M.J. Chapman (UK)</i>	273
--	-----

Piecewise-linear approximation of solution of linear differential equations by Walsh functions, <i>M. Ohkita and Y. Kobayashi (Japan)</i>	297
Numerical simulation of the nonlinear Schrödinger equation, <i>T.R. Taha (USA)</i>	309
Book Reviews, <i>W.F. Ames and C. Brezinski (USA / France)</i>	313
News of IMACS	321

Number 4, October 1990

A note on examples of Volterra integral equation with exact solution, <i>J. Abdalkhani (USA)</i>	335
A symbolic generator of state equations for modeling of electrical systems, <i>E.V. Depiante (USA)</i>	339
Finite-dimensional approach to estimation of functional parameters in a parabolic system, <i>K. Nakano, I. Tsurumi and S. Sagara (Japan)</i>	351
Some explicit three-level finite-difference simulations of advection, <i>J. Noye (Australia)</i>	359
Optimization of static simulation models by the score function method, <i>R.Y. Rubinstein and A. Shapiro (Israel)</i>	373
Analytical and simulation studies of a multiprocessor system for high-speed numerical computations, <i>C. Siva Ram Murthy and V. Rajaraman (India)</i>	393
A numeric-symbolic expert system for 2-D and 3-D object recognition in robotic applications, <i>S. Tzafestas and G. Kechriotis (Greece)</i>	403
Book Reviews, <i>W.F. Ames and C. Brezinski (USA / France)</i>	419
News of IMACS	433

Numbers 5,6 (Parameter Identifications with Error Bound), December 1990

Foreword, <i>E. Walter (France)</i>	447
Estimation of parameter bounds from bounded-error data: a survey, <i>E. Walter and H. Piet-Lahanier (France)</i>	449
A compact algorithm for the intersection and approximation of <i>N</i> -dimensional polytopes, <i>V. Broman and M.J. Shensa (USA)</i>	469
Fast and robust algorithm to compute exact polytope parameter bounds, <i>S.H. Mo and J.P. Norton (UK)</i>	481
Exact recursive characterization of feasible parameter sets in the linear case, <i>H. Piet-Lahanier and E. Walter (France)</i>	495
Recursive membership set estimation for output-error models, <i>T. Clément and S. Gentil (France)</i>	505
Recent developments in optimal bounding ellipsoidal parameter estimation, <i>A.K. Rao and Y.-F. Huang (USA)</i>	515
Parameter bounding for time-varying systems, <i>J.P. Norton and S.H. Mo (UK)</i>	527
Membership-set estimation using random scanning and principal component analysis, <i>K. Keesman (Netherlands)</i>	535
A bounded-error approach to accuracy analysis in ellipsometry, <i>M.K. Smit and J.W. Verhoof (Netherlands)</i>	545
Characterization of non-connected parameter uncertainty regions, <i>H. Piet-Lahanier and E. Walter (France)</i>	553

Identification, structure selection and validation of uncertain models with set-membership error description, <i>G. Belforte, B. Bona and V. Cerone (Italy)</i>	561
Experiment design for bounded-error models, <i>L. Pronzato and E. Walter (France)</i>	571
Optimal algorithms for system identification: a review of some recent results, <i>R. Tempo and A. Vicino (Italy)</i>	585
Bounded-error data, and frequency response design, <i>B. Kouvaritakis and M.S. Trimboli (UK)</i>	597
News of IMACS	609
